# Aviro takes a human-centered approach to the intersection of Medicine, Design and Technology to create digital tools that improve the quality of healthcare.

Ithaka is a mobile tool (web, WhatsApp, app) that empowers patients by giving them the right information and tools (notifications, appointments, chat support, etc) at the right time to successfully test for diseases and link to care.

ITHAKA

Do you know your HIV status?

Use the kit to find out your HIV status in private and on your own time!

AVIRO

Aviro

is an inclusive team of mobile health experts with diverse and extensive expertise in mobile health solutions. We complement empirical observation with the qualities of empathy, narrative and meaning to create significance and change in the world of healthcare.

Now Recruiting: Implementation Coordinators, Cape Town, South Africa (Part time)

Background

Ithaka is a digital support and linkage to care tool that improves infectious disease testing. The tool has been tested in studies with Johns Hopkins, Wits University and others, and several high-profile health providers in South Africa, Kenya and Zimbabwe. We have a strong team in place and are looking to complement it with people in Cape Town who are excited to work with us to create change in large health organisations - to use their skills and personality to help our partners to roll out our tools by providing trainings, process change inputs and reports, and basic technical support.

What we are looking for:

- An enthusiastic, careful and curious person with experience assisting in the roll out a program (ideally in health and/or digital space) that can ensure the timely and successful delivery of our solutions according to customer needs and objectives
- Proven people skills and experience in engaging with, coordinating resources at, and driving change within a large organisation.
- Ability to create and share clear reports on program progress and identify opportunities for improvement in the processes of Aviro and our clients.
- Willingness to travel frequently to health facilities around town and to engage with client teams.
- The ideal candidate will also have experience in digital health, especially in HIV; speak multiple local languages; and have comfort and fluency with mobile technology.
- Your safety is critical to us. Aviro will provide guidance and training and PPE for site visits. It is a prerequisite of the job for you to have your own transport in order to get to sites safely.

If you are interested, please send your CV and a cover letter (please be REAL in your letter and tell us about you) to info@avirohealth.com by 15th July 2020.
